

A Breach of Security Safeguards: Key Strategies for Complying with New PIPEDA Regulations

PRIVATECH

During this webinar, a leading PIPEDA expert will share **key strategies for a compliant breach response program**. You will receive detailed guidance based on lessons learned from the mandatory breach reporting obligations in Alberta (largely mirrored in the new PIPEDA regulations); in-depth direction on assessing whether a breach poses a 'real risk of significant harm'; practical strategies for breach recordkeeping and notifying individuals of breaches; simple steps for ensuring service providers support your ability to comply; and **practical know-how on data breach management strategies based on case studies and breach scenarios**.

The PIPEDA amendments introduced new offences and fines. This webinar will help your organization **avoid a fine for contravening the new breach response rules**.

Participants will receive the following useful resources as take-aways:

- *Template data breach response procedure;*
- *Template data breach recordkeeping log;*
- *Flowchart for breach notification and reporting decision-making process;*
- *Critical sample service provider contractual clauses relating to data breaches; and*
- *A notice upon finalization of the regulations summarizing any changes, and a summary of any guidance documents received from the Privacy Commissioner/Federal Government.*
